

SNIPER

The sniper range of metal lures looks like another baitfish profile, but a closer inspection will show the knowledgeable fisherman, it certainly is not. It is designed for "High Speed Spinning". The Sniper is slim at the casting end and weighted at the hook end for bullet like casting performance. With non-symmetrical angles at both ends, it delivers a tight, "darting and weaving" action. It is deadly for speedsters like Tuna, and excellent for many pelagics. It can also be jigged, as its design allows for the lure to quickly get down to where the fish are biting.

Sniper OPTIONS: All Snipers are available in chrome, gold, blue, purple, pink, green and white main body version. See color chart for sticker option. All models 15,25,35,50 are available with Lure-tail option, Maniac All models 60,75, 95, are available with stainless steel welded ring option and either treble hooks, Single Siwash hooks or Lure Tails.
